## INTRODUCTION

The Wyoming Association of Sheriffs and Chiefs of Police has been collecting substance-related data from all persons booked into every county detention facilities in Wyoming since 2005.

*To date, information has been collected from a total of 201,638 persons who were arrested and subsequently detained in a detention facility in Wyoming.*

The Wyoming Association of Sheriffs and Chiefs of Police publish the results and analysis of the data-collection efforts each year in three separate reports.

The main report provides statewide statistics and averages, along with comparisons of county statistics in specific categories. An accompanying supplemental report provides county, community and local law enforcement agency specific statistics. This Executive Summary provides selected statistics, information and highlights from the main report.

These reports can be accessed online on the following websites: <http://wascop.com> and <http://jandaconsulting.com>

## EXECUTIVE SUMMARY

This Executive Summary highlights a few of the significant findings contained in the main report. It focuses on issues that are of obvious concern or which may be of greater interest to the general public.

However, a careful review of other relevant findings and statistics contained in the main body of this report is essential to gain a more complete perspective of the impact of alcohol on crime in Wyoming.

## Alcohol and Crime in Wyoming - 2017

The profile of the average person taken to jail in Wyoming continues to be relatively consistent with previous years. Three out of four times it was a male (females have increased incrementally in recent years, 24.68% this year), average age 35. 15.5% of the time it was an out-of-state visitor and 6.8% of the time it was an in-state visitor. Juvenile arrests resulting in detention in a detention facility accounted for less than 1% of the total custodial arrests (86 out of 13,638).

A review of the data collected from persons arrested and subsequently taken to jail indicates that Wyoming continues to be relatively safe from what is generally considered to be “serious” crime. The number of persons who are arrested for felonies are relatively low when compared to the number of persons arrested for minor crimes (misdemeanors). ***Felony arrests accounted for 12.5% of the total arrests statewide.***

***Although Wyoming is relatively “safe” from what is generally considered to be serious crime (felonies), the high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence, and the high levels of blood alcohol content for drivers arrested for being impaired represent real and significant threats to public safety.***

***The information collected from a total of 13,638 persons who were arrested and subsequently detained in a county detention facility in Wyoming during 2017 confirms what law enforcement officers who patrol the streets and highways and who respond to calls for service in Wyoming already know from experience – alcohol is the contributing factor most often present in situations that result in someone going to jail.***

### Meth. Alcohol and Other Drugs Involved Arrests

#### SUMMARY OF SUBSTANCE-INVOLVED ARREST STATISTICS FOR 2016:

- Alcohol was involved in 48.83% of all custodial arrests.
- Methamphetamine was involved in 9.91% of the 13,638 reported arrests.
- Marijuana was involved in 14.35% of all custodial arrests.
- Drugs were involved in 23.63% of the reported arrests.
- Arrests for public intoxication accounted for 13.62% of all arrests.
- The average blood alcohol content for persons arrested for public intoxication was 0.2291.
- Driving under the influence arrests accounted for 26.60% of all arrests.

## Alcohol and Crime in Wyoming - 2017

- The average reported blood alcohol content for DUI arrests statewide was 0.155.<sup>1</sup>
- 45% of persons arrested for DUI had a reported BAC level above 0.16 and 9% had a BAC of 0.24 or greater.
- The average reported BAC for 411 persons who were arrested for DUI after being involved in a traffic crash was 0.171.
- The age group with the highest percentage of DUI arrests were ages 26-30, followed by ages 21-25 and 31-35.

### DUI Arrests with Reported BAC in Each Range

<sup>1</sup> In Wyoming, a person driving with a blood alcohol content of 0.08 is legally presumed to be impaired.

## Alcohol and Crime in Wyoming - 2017

---

*To grasp the significance of the blood alcohol content statistics, it should be noted that a physically fit male who weighs 180 pounds would have to consume at least seven drinks in one hour to achieve a BAC of 0.15 – a female weighing 120 pounds would have to consume four drinks in one hour.*

Please refer to the Alcohol Impairment Educational Guides for males and females in the Attachments Section of the main report for information about the level of impairment for other body weights and drinks consumed.

### EMERGING TRENDS

#### **EMERGING TRENDS IN THE TYPE OF SUBSTANCE INVOLVED IN CRIME:**

Alcohol and/or other drugs were involved in 76% of the 13,638 custodial arrests in 2017.

Although alcohol-involved arrests continue to be the drug most often present in situations that result in someone going to jail, changing trends in the types of substance involvement in crime in Wyoming have recently emerged.

*During the last eight years in which data is available for a calendar year period (2010-2017), the number and percentage of alcohol-involved arrests have continued to decrease - while the*

*number and percentage of other drug-involved arrests have continued to increase.*

The number of alcohol-involved arrests have decreased each year since 2010. Alcohol-involved arrests in 2017 were 6,939 fewer in number (a 51% decrease) than in 2010.

The number of other drug-involved arrests has increased each year since 2010 (except for one year). Drug-involved arrests were 1,431 more in number (an 80% increase) than in 2010. The number of

## Alcohol and Crime in Wyoming - 2017

meth-involved arrests has increased each year since 2011 and has more than tripled since then. There were 1,351 meth-involved arrests in 2017 (there were 420 in 2011).

The Association began collecting marijuana-involved arrest data in March of 2014 to assess the impact on public safety in Wyoming from Colorado's legalization of marijuana. Data collected thus far indicates an increase in the number and percentage of marijuana-involved arrests each year. 7.63% in 2014; 9.51% in 2015; 12.22% in 2016 and 14.35% in 2017.

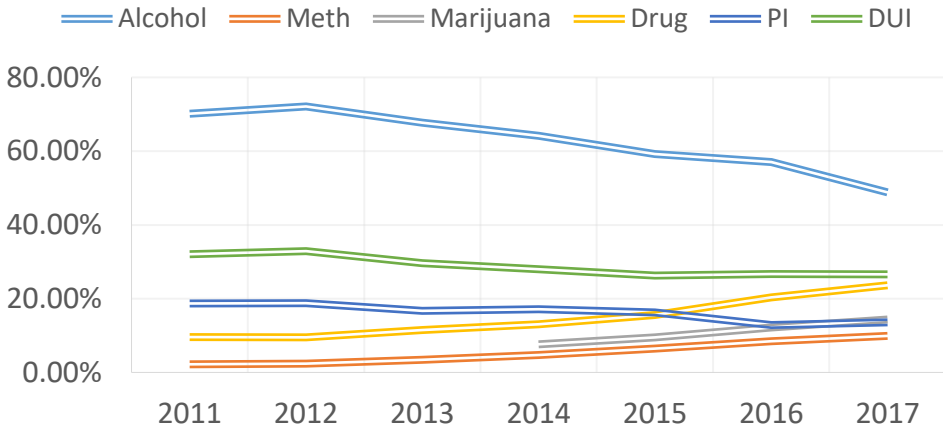

**TRENDS IN ARRESTS FOR IMPAIRED DRIVING:** The statistics for persons arrested for driving while impaired mirrors the recent trends for all substance-involved arrests. The percentage and number of persons arrested for driving impaired has decreased during each of the last eight years while the percentage for other drug-involvement for impaired driving arrests has increased.

And, the average blood alcohol content for persons arrested for impaired driving during the last eight years remains at double the presumptive level for impairment – while the average blood alcohol content for persons arrested for public intoxication remains at almost three times the presumptive level.

## PUBLIC CONCERNS

*The statistics contained in this report identify significant public safety issues which merit further discussion, analysis and action by local law enforcement, citizens and state/community leaders*

The high percentage of alcohol involved arrests, the inordinate number of arrests for public intoxication and DUI and the high levels of BAC recorded for these individuals for public intoxication appear to validate the concerns about alcohol abuse expressed by Wyoming residents in the most recent statewide public opinion survey<sup>2</sup>.

Some excerpts from the survey that involved 4,798 Wyoming residents:

- 79.7% view alcohol abuse by Wyoming adults as a serious or somewhat serious problem.
- When Wyoming residents were asked whether they would support a state law that would prohibit selling or serving alcohol to someone who is obviously intoxicated:
  - 64.3% strongly supported such a law
  - 17.9% somewhat supported such a law
- 84.5% of Wyoming residents believe that drinking and driving in their community is a serious or somewhat serious problem.

## INTRODUCTION

The Wyoming Association of Sheriffs and Chiefs of Police has been collecting substance-related data from all persons booked into county detention facilities in Wyoming since 2005. The data-collection process has been refined since that initial effort and has now been institutionalized as a part of the book-in process year-round for all custodial arrests in all twenty-three counties in Wyoming.

Although it had always been suspected that alcohol was a significant factor in custodial arrests in Wyoming, reliable data had not been available previously to more accurately determine the scope and impact of alcohol on crime in this state. A sufficient amount of substance-related arrest data has been collected during the past thirteen years which can now be analyzed to identify trends relative to alcohol, as well as other drug involvement in crime in Wyoming. Consistent patterns

of alcohol and other drug involvement for certain crimes are now more evident and the frequency of occurrence more predictable.

This report contains an analysis of substance-related arrest information collected in all twenty-three counties in Wyoming during a twelve-month period (January 1 through December 31, 2017) by the Wyoming Association of Sheriffs and Chiefs of Police. Information was collected from a total of 13,638 persons who were arrested and subsequently detained in a county detention facility. Data collected from 1,898 persons booked into the Volunteers of America Center of Hope in Fremont County is also included. The substance-related arrest data contained in this report provides a statistical picture of the impact that substance abuse is having on crime in Wyoming.

***To date, information has been collected from a total of 201,638 persons who were arrested and subsequently detained in a detention facility in Wyoming.*** Specific information collected during the book-in process includes the following:

- Type of offense;
- Whether alcohol or other drugs were involved;
- Location of last consumption and point of sale;
- Blood alcohol content levels for alcohol related arrests; and
- Demographic information.

The Wyoming Association of Sheriffs and Chiefs of Police publish the results and analysis of the data-collection efforts each year in three separate reports. The main report provides statewide statistics and averages, along with comparisons of county statistics in specific categories. An accompanying supplemental report provides county, community and local law enforcement agency specific statistics. The third report is an Executive Summary which provides selected statistics, information and highlights from the main report. These reports can be accessed online on the following websites: <http://wascop.com> and <http://jandaconsulting.com>

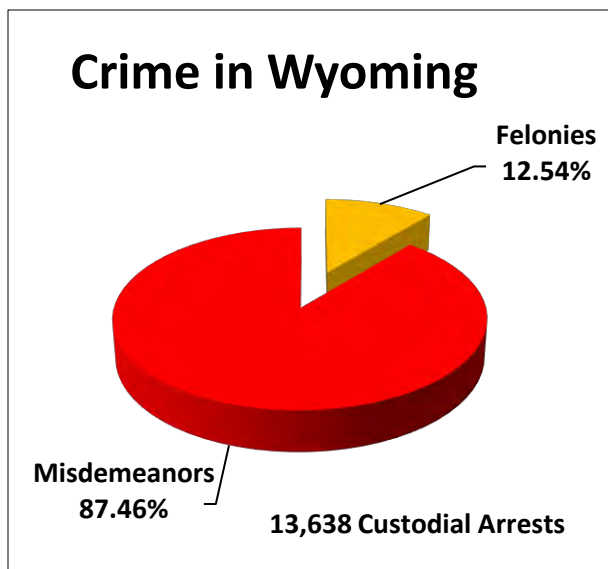

## EXECUTIVE SUMMARY

This Executive Summary highlights a few of the significant findings contained in this report. It focuses on issues that are of obvious concern or which may be of greater interest to the general public; however, a careful review of other relevant findings and statistics contained in the main body of this report is essential in order to gain a more complete perspective of the impact of alcohol on crime in Wyoming.

The profile of the average person taken to jail in Wyoming continues to be relatively consistent with previous years. About three out of four times it was a male (females have increased incrementally in recent years, 24.68% this year), average age 35. 15.5% of the time it was an out-of-state visitor and 6.8% of the time it was an in-state visitor. Juvenile arrests resulting in detention in a detention facility accounted for less than 1% of the total custodial arrests (86 out of 13,638).

A review of the data collected from persons arrested and subsequently taken to jail indicates that Wyoming continues to be relatively safe from what is generally considered to be “serious” crime. The number of persons who are arrested for felonies are relatively low when compared to the number of persons arrested for minor crimes (misdemeanors). Felony arrests accounted for 12.5% of the total arrests statewide.

*Although Wyoming is relatively “safe” from what is generally considered to be serious crime (felonies), the high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence, and the high levels of blood alcohol content for drivers arrested for being impaired represent real and significant threats to public safety.*

The information collected from a total of 13,638 persons who were arrested and subsequently detained in a county detention facility in Wyoming during 2017 confirms what law enforcement officers who patrol

the streets and highways and who respond to calls for service in Wyoming already know from experience – alcohol is the contributing factor most often present in situations that result in someone going to jail.

### Meth. Alcohol and Other Drugs Involved Arrests

#### SUMMARY OF SUBSTANCE-INVOLVED ARREST STATISTICS FOR 2017:

- Alcohol was involved in 48.83% of all custodial arrests.
- Methamphetamine was involved in 9.91% of the 13,638 reported arrests.
- Marijuana was involved in 14.35% of all custodial arrests.
- Drugs were involved in 23.63% of the reported arrests.
- Arrests for public intoxication accounted for 13.62% of all arrests.
- The average blood alcohol content for persons arrested for public intoxication was 0.2191.
- Driving under the influence arrests accounted for 26.60% of all arrests.
- The average reported blood alcohol content for DUI arrests statewide was 0.1546<sup>1</sup>
- 45% of persons arrested for DUI had a reported BAC level above 0.16 and 9% had a BAC of 0.24 or greater.
- The average reported BAC for 530 persons who were arrested for DUI after being involved in a traffic crash was 0.1713.
- The age group with the highest percentage of DUI arrests was age 26-30 (16%), followed by age 21-25 (15%) and 31-35 (13%).

<sup>1</sup> In Wyoming, a person driving with a blood alcohol content of 0.08 is legally presumed to be impaired.

*To grasp the significance of the blood alcohol content statistics, it should be noted that a physically fit male who weighs 180 pounds would have to consume at least seven drinks in one hour to achieve a BAC of 0.15 – a female weighing 120 pounds would have to consume four drinks in one hour.*

Please refer to the Alcohol Impairment Educational Guides for males and females in the Attachments Section of this report for information about the level of impairment for other body weights and drinks consumed.

### EMERGING TRENDS

**EMERGING TRENDS IN THE TYPE OF SUBSTANCE INVOLVED IN CRIME:** Alcohol and/or other drugs were involved in 76% of the 13,638 custodial arrests in 2017. Although alcohol continues to be the drug most often present in situations that result in someone going to jail, drug-involved arrests in Wyoming have increased significantly in recent years.

During the last eight years in which data is available for a calendar-year period (2010-2017), *the number and percentage of alcohol-involved arrests have continued to decrease - while the number and percentage of other drug-involved arrests have continued to increase.*

The number of alcohol-involved arrests have decreased each year since 2010. Alcohol-involved arrests in 2017 were 6,939 fewer in number (a 51% decrease) than in 2010.

The number of other drug-involved arrests has increased each year since 2010 (except for one year). Drug-involved arrests were 1,431 more in number (an 80% increase) than in 2010.

*The number of meth-involved arrests has increased each year since 2011 and has more than tripled since then.* There were 1,351 meth-involved arrests in 2017 (there were 420 in 2011).

The Association began collecting marijuana-involved arrest data in March of 2014 in an effort to assess the impact on public safety in Wyoming from Colorado's legalization of marijuana. Data collected thus far indicates an increase in the number and percentage of marijuana-involved arrests each year. 7.63% in 2014; 9.51% in 2015; 12.22% in 2016 and 14.35% in 2017.

The four counties with the highest number of arrests involving marijuana were: 1) Laramie – 259; 2) Natrona – 238; 3) Campbell – 221; and 4) Carbon – 213.

## Alcohol and Crime in Wyoming - 2017

**TRENDS IN ARRESTS FOR IMPAIRED DRIVING:** The statistics for persons arrested for driving while impaired mirrors the recent trends for all substance-involved arrests. The percentage and number of persons arrested for driving impaired has decreased during each of the last five years while the percentage for other drug-involvement for impaired driving arrests has increased.

The average blood alcohol content for persons arrested for impaired driving during the last seven years remains at double the presumptive level for impairment – while the average blood alcohol content for persons arrested for public intoxication remains at almost three times the presumptive level.

## Alcohol and Crime in Wyoming - 2017

Although the number and percentage of DUI arrests have decreased statewide in each of the last three years, the percentage of DUI arrests in several counties in the state have been consistently above the statewide average.

**PUBLIC CONCERNS**

*The statistics contained in this report identify significant public safety issues which merit further discussion, analysis and action by local law enforcement, citizens and state/community leaders*

The high percentage of alcohol involved arrests (49%), the inordinate number of arrests for public intoxication (1,858) and DUI (3,628) and the high levels of BAC recorded for these individuals (average BAC: 0.219 for public intoxication and 0.155 for DUI) appear to validate the concerns about alcohol abuse expressed by Wyoming residents in the most recent statewide public opinion survey<sup>2</sup>.

Some excerpts from the survey that involved 4,798 Wyoming residents:

- 79.7% view alcohol abuse by Wyoming adults as a serious or somewhat serious problem
- When Wyoming residents were asked whether they would support a state law that would prohibit selling or serving alcohol to someone who is obviously intoxicated:
  - 64.3% strongly supported such a law
  - 17.9% somewhat supported such a law
- 84.5% of Wyoming residents believe that drinking and driving in their community is a serious or somewhat serious problem.

## JUVENILE/ UNDERAGE DATA

The data in this report does not represent a complete accounting of juvenile arrests as these arrests often do not result in detention in a county facility.

248 underage youth were taken into custody and placed in a detention center this year for being a minor in possession of alcohol. The average BAC was .1253.

173 underage youth were arrested for driving under the influence – 47 of these arrests involved drugs. The average BAC was .1110. Eleven of the underage youth arrested for DUI were under the age of 18.

- 5% of all persons arrested for driving under the influence (DUI) were under the age of 21.

### PROJECT DESIGN AND IMPLEMENTATION

The Wyoming Association of Sheriffs and Chiefs of Police contracted with Johnson and Associates, a Wyoming based management consulting firm, to manage and staff this project – to create the master database, to collect and input data, to author the final report and to make presentations to select groups. The Association has contracted with Johnson and Associates to manage and staff this project since its inception.

A task force comprised of administrators and detention facility personnel from each of the county law enforcement agencies involved in the initial data collection efforts in 2005 determined the scope and intent of the project and provided specific direction for its implementation. In the following years, all law enforcement and detention facility administrators in the state were involved in deciding the appropriate fields for collection of data, selecting the subject areas that would be targeted for analysis and refining the process and procedures for collecting the information.

A supply of reporting forms and self-addressed stamped envelopes were provided to all detention facilities in the state - along with an instruction sheet for processing the completed reporting forms. In addition, all detention facility personnel who were assigned the responsibility to oversee their agencies' data collection were provided individual orientations. All completed reporting forms were submitted to Johnson and Associates for data entry on a weekly basis.

The master database for this project was created in a manner that will allow “harvesting” of additional information in the future should a need arise. The data in this report is presented by “county” and by “department,” by actual numbers and percentages, and by various categories of interest. The information was assembled in this manner to assist law enforcement administrators, as well as community leaders, to better analyze the information and to facilitate follow-up inquiries of notable concerns.

### DATA COLLECTION

A one-page reporting form consisting of fill-in or checked boxes was constructed and refined for this project. It is estimated that the form requires the booking and/or arresting officer two-to-three minutes to fill out during the book-in process. Specific information that was collected during the book-in process include: type of offense, whether alcohol was involved; whether drugs were involved; location of last consumption and point of sale; known blood alcohol content levels for arrests involving public intoxication, driving under the influence and minors in possession; and demographic information. (A sample of the reporting form is included in this report)

A total of 15,536 reporting forms were submitted by the twenty-three county detention facilities and the Volunteers of America Detox Center in Fremont County during the twelve-month data collection period January 1 through December 31, 2017. A complete accounting of the number of reports submitted by each county compared to the number of actual field-arrests book-ins is provided after the Data/Statistics pages.

### DATA /STATISTICS

All information contained in the reporting forms that were submitted by the participating counties was entered into a master data base by week and by month. This information was subsequently assembled by category, by county, and by department to facilitate appropriate comparisons and further analysis.

A detailed breakdown of information for each county is available in a separate Supplemental Report.<sup>3</sup> A sample of the county statistics is included in this report. Natrona County was selected as the sample to be included as this county generated the greatest number of arrest statistics.

The substance-related arrest data in this report is presented in a series of tables and graphs:

- ❖ Tables – Number of Arrests and Percentages
- ❖ Pie Chart – Methamphetamine, Alcohol and Other Drugs
- ❖ Tables – Felony/Misdemeanor Arrests Involving Alcohol
- ❖ Bar Graphs – Alcohol Arrests Percentages, BAC
- ❖ Pie Graphs – DUI, BAC, Traffic Crash Statistics
- ❖ Tables and Bar Graphs – Juvenile Statistics
- ❖ Pie Graph – Juvenile Demographics, Where Minors Obtain Alcohol
- ❖ Table – Natrona County Statistics (Sample County Statistics)

**PLEASE NOTE:** Cheyenne Police Department officers have an option to cite and release persons arrested for DUI for a first offense and the arrestee's vehicle has been impounded. These additional arrests statistics have not been included in the DUI statistics in this report (as they were not booked into a detention facility) but are added as a footnote in the DUI graph and in the Supplemental Report for Laramie County.

ACKNOWLEDGEMENTS

This project was accomplished due to the committed support of all the law enforcement administrators in Wyoming, and the Sheriffs' generous commitment of agency resources. The day-to-day supervision and weekly submittal of the project reporting forms and the individual efforts of the hundreds of arresting/detention officers who filled out the reporting forms should be acknowledged as well. Their collective efforts were essential to the overall success of this project.

2. In the event that a third party is convicted of illegally distributing or possessing with intent to distribute a controlled substance in the licensed premises, and the city council finds that there is substantial evidence that such occurred with the licensee's, or its agent's or employee's prior knowledge while employed within the licensee's establishment, of the action leading to the conviction, and that licensee, its agent or employee did not report his or her knowledge of such

- sale or possession to a peace officer, as that term is defined in Wyoming Statutes Section 7-2-101 (1977), as soon as practicable, the licensee shall acquire one hundred fifty points.
3. Should the city council become aware that an event, as described in subsection (D)(1), (D)(2) or (E) of this section, may have occurred, it shall provide the licensee with notice and an opportunity for a hearing. Notice of such hearing shall precede consideration of the matter by at least ten days, shall be served personally or by mail to the address of the licensee listed on the licensee's most recent liquor license application to the city, and shall include a statement:
    - a. That the city council has been informed that one or more of the events described in subsection (D)(1), (D)(2) or (E) of this section, has occurred and that as a result demerit points may be attributed to the licensee and that a suspension and/or revocation of the license is possible;

In the event of a gross violation, the city council may authorize a petition to the district court pursuant to Wyoming Statutes Section 12-7-201 to revoke a licensee's license.
3. The sanctions provided in this section for demerit points are cumulative, and therefore points may result in multiple sanctions. Accumulated points shall not be excused at the end of the license year, but shall instead continue to be counted against a licensee for the periods described in this section of the Casper Municipal Code.
- F. If it appears to the city council that a licensee has acquired sufficient points to result in a suspension or revocation of its license, the licensee shall be afforded an opportunity for hearing before the city council. The purpose of such hearing is to allow the licensee to provide information demonstrating that such points have not been acquired. Notice of such hearing shall precede consideration of the matter by at least ten days, shall be served personally or by mail to the address of the licensee listed on the licensee's most recent liquor license application to the city, and shall include a statement:
1. That it appears to the city council that the licensee has acquired points such that a suspension and/or revocation of the licensee's license is appropriate;
  2. Summarizing the nature and date(s) of the incidents resulting in points and the number of demerit points alleged to have been acquired by the licensee as a result of such incidents;

3. That a hearing on the subject has been scheduled before the city council, and further informing the licensee of the time and place of the hearing; and
  4. That the purpose of the hearing is to allow the licensee to offer corrections to the information demonstrating such points have not been acquired.
- G. At a hearing, a licensee may appear in person or through counsel. A licensee will be given an opportunity to present evidence and argument on the relevant issue. Evidence relied on shall consist of information commonly relied upon by reasonably prudent people in the conduct of their serious affairs. If a hearing examiner is appointed, the council shall direct the examiner to forward the record of the hearing to the council either with or without proposed findings of fact and conclusions of law, and with or without the opinion/recommendation of the examiner.

Filing an appeal as provided in such rules, stays enforcement of the suspension decision pending final order on the appeal. The city council's action may be set aside by the district court if it finds the action to be:
1. Arbitrary, capricious, or otherwise not in accordance with law;
  2. Without observance of the procedure required by law; or
  3. Unsupported by substantial evidence.

Such fee shall be paid within ten days of the notice to pay. The notice to pay shall be issued by the city clerk upon notification by the court of convictions for the relevant offenses, but the time frame for accumulation of the fees shall be based on date of violation, not conviction. It shall be in council's sole discretion, after hearing, whether to impose or suspend the fee. The hearing shall not be a contested case hearing, and the Wyoming Administrative Procedures Act shall not apply to such hearing.

SUBJECT: Conceptual ideas and costs of developing Rocky Mountain Oncology property

Recommendation:

Costs for possible development of Rocky Mountain Oncology property.

Summary:

Staff has developed a list of possible amenities and costs for the development of the Rocky Mountain Oncology property. The property is located along Venture Way off of Second Street.

The table below lists costs by installation and yearly upkeep. The upkeep costs involve water consumption, electrical consumption and labor & equipment for various repairs to the infrastructure that may need to take place. The exhibits illustrate the complete buildout of the park. Actual costs would be dispersed as features would be installed in phases.

Council was interested in the possibility of developing a dog park at this location. In an effort to minimize fencing costs, a small portion of the available acreage is proposed to be set aside for this purpose. The proposed area encompasses a little under half an acre. To accommodate dog park patrons an off-street parking area is proposed to allow for 18 to 20 vehicles. The size of the parking area may seem large to solely service the dog park area; however, expansion of amenities on the property in the future could cause the area to become a destination park with ample parking available.

Council was also interested in the possibility of using the pond as an irrigation source for turf grass. Staff has researched the permits from the State Engineers office and has discovered that the pond can only be used for wildlife and recreation purposes at this time. With this in mind the one acre proposed turf area has been proposed using city water. This is not to say that the permits could be amended to allow for irrigation in the future. If the pond water was to be used for irrigation, staff recommends testing it to make sure it is conducive for this purpose.

House and Senate Committees had until end of day on Friday, February 1 to complete consideration of the 183 bills assigned and potentially the 43 bills introduced, but not yet assigned to a committee.

On Wednesday, February 6, any bill not passed out of the originating chamber on Third Reading will be "postponed indefinitely" which means the bill is dead for this session.

With the passing of Week 4, we are halfway through the Session.

The WAM Website [www.wyomuni.org](http://www.wyomuni.org) contains information on all the bills we are tracking and identifies bills that directly and indirectly relate to WAM. The following is a summary of several of the most important bills WAM is tracking. Please note these are not all of the bills we are following, but the ones that most directly affect our members. As noted, the full legislative summaries and bill status are on the WAM website.

### State Budget

The Supplemental Budget is processed through the separate chambers on mirrored bills. These were passed out of the Joint Appropriations Committee and introduced on the floors of the House and Senate. Both the House and Senate spent significant time working on the Supplemental Budget. House Bill 01 is the House Budget version, and Senate File 01 is the Senate's version.

As was discussed previously, Governor Mead's recommended budget included \$25 million for local governments and the Joint Appropriations Committee removed these funds from its budget. Discussions with both Appropriations Chairman inquiring on restoration of a supplemental amount for local government resulted in none will take place. In addition, we have asked several legislators to restore this funding (or at least a portion of it), but to date have had no positive responses to our request.

**There is a \$70 million discrepancy between HB 01 and Senate File 01. These differences will need to be resolved in the Conference Committee.**
