Good Morning WAM!

Several media outlets reached out in response to WAM's Press Release on Amendment A and have begun writing news stories and sidebars about it. The CBS affiliate here in Cheyenne came out and filmed at the WAM office and featured WAM Executive Director Dave Fraser explaining Amendment A and it's importance to the state's municipalities. A link to the story can be found here.

<https://www.wyomingnewsnow.tv/2020/09/22/wam-encourages-wyoming-citizens-to-support-constitutional-amendment-a/>

Also please find attached the ad that will be delivered to more than 350,000 people across the state over the next couple of weeks. Feel free to print and post this ad where your citizens might see it. We will continue our efforts to educate the general voting public on Amendment A between now and election day, and are here to answer any questions you may have about the amendment, what it would mean to your community, and how we might be able to help you get the word out locally.

Warm regards,

Amendment A

- Protects Wyoming's clean water by allowing cities and towns to improve and better maintain their wastewater treatment systems and facilities.
- It is not a tax. Instead it simply grants the legislature more latitude to allow cities and towns to pay for wastewater improvements over time by eliminating an antiquated debt cap in the Wyoming Constitution.
- Supported by 90-percent of the Wyoming Senate on final passage vote in 2019, and humbly requested by the 98 cities and towns of Wyoming as represented by the Wyoming Association of Municipalities.

Sponsorship

Please consider being a sponsor for the event. Sponsorship information is attached.

Eradicating Polio

As a founding partner of the **Global Polio Eradication Initiative**, Rotary reduced polio cases by 99.9 percent since the first project to vaccinate children in the Philippines in 1979.

Rotary has helped immunize more than 2.5 billion children in 122 countries. So far, Rotary has contributed more than \$1.8 billion toward eradicating the disease worldwide.

Today, polio remains endemic only in Afghanistan, Nigeria, and Pakistan. But it's crucial to continue working to keep other countries polio-free. If all eradication efforts stopped today, within 10 years, polio could paralyze as many as 200,000 children each year.
